

Fixer NF

DESCRIPTION

Fixer NF is cationic polymer fixative containing no formaldehyde for use in denim sizing and finishing. The product is effective in reducing dye bleeding during wet processing of fabrics. It is an outstanding binding and surface modifying agent for indigo and sulfur over dyeing processes.

Fixer NF is highly recommended to minimize denim back staining resulting from indigo dye bleed during wet processing. The product will also help improve wet crock fastness.

BENEFITS

Fixer NF has the following beneficial characteristics.

- Reduces indigo bleed
- Improves wash fastness
- Reduces back staining
- Does not negatively affect hand

TYPICAL PROPERTIES

Color	Light Amber
Texture	Hazy Liquid
Odor	Mild
PH	About 3.2
Ionic Nature	Cationic
Solids	About 30%

PREPARATION

Fixer NF needs no pre-dilution prior to use. Simply add the desired dosage to the bath and mix thoroughly. We recommend the product by dosed to size liquor bath after completion of the cooking cycle.

APPLICATION

Fixer NF may be dosed as follows.
Apply at 1.0 – 3.0% on weight of bath

HANDLING

Please refer to the Material Safety Data Sheet for details.

STORAGE

Fixer NF has a short shelf life due to high molecular weight. If it is diluted 50:50 with water, the shelf life is enhanced significantly.

PACKAGING

Fixer NF is available in plastic drums.
